OBJETIVE

I am looking for job opportunities in companies that allow me to continue improving my skills and demonstrate what I am capable of. My goal is to apply and expand these skills in a dynamic professional environment, where I can continue my professional growth, development and improvement on an ongoing basis. Likewise, I aspire for my job to allow me to pay for my studies to learn English and open the doors of the world to achieve my professional and personal ambitions.

IDIOMAS

- Spanish (native)
- English (basic)

ADDITIONAL INFORMATION

- Preference for remote work, but available to work in person and willing to move if necessary.
- Flexibility to adapt to any location, without particular preference for working exclusively in Argentina

KEVIN RUDY MÁRMOL

SOFTWARE DEVELOPMENT TECHNICIAN

PROFESSIONAL PROFILE

Graduated as a Higher Technician in Software Development at Blas Pascal University, specialized in **PHP** for backend, but I have also worked with languages such as **Python** and **C#** in .net, in addition to its different frameworks, adapting to client preferences, but to a lesser extent. He completed numerous successful projects that demonstrate my skill in this area. My web portfolio reflects my dedication and skills in PHP and other languages and technologies.

SKILLS

- Web Development: **HTML**, **CSS**, **JavaScript**, **SASS**
- Backend and Applications: **PHP** (higher specialization), **Python**, **C#**
- Databases: **MySQL** (planning to learn **MongoDB**)
- Frameworks: **Laravel**, **Angular**, **Django**, **React**, **Tailwindcss**
- Libraries: **jQuery**, **Node.js**
- Computer Security: **Audits**, **pentesting**, **ethical hacking**
- Video Game Development: **Unity (C#)** as a hobby
- Tools: **Visual Studio**, **Gulp**, **AJAX**, **Apache**, **Docker**, **GIT**, **Jira**, **Sony Vegas**, **Photoshop**
- APIs: Experience with **REST API**
- **UML**, requirements analysis and software architectures

EDUCATION

Blas Pascal University, Santa Rosa, La Pampa (2020-2023)

- Graduated with a GPA of 9.17

Extra-training on Udemy (2017-Present)

- My completion certificates can be seen in my web portfolio

WORK EXPERIENCE:

Online Freelance:

- I did a large amount of fullstack web development work for clients on remote work sites, ranging from conceptualization to full implementation, with excellent navigability, performance, SEO and good practices.
- I used a variety of technologies and languages, including PHP, C#, Python, JavaScript, HTML, CSS and SASS, as well as their different frameworks, mainly Laravel, and thus created personalized solutions according to the needs of each client, adapting to different environments and requirements.

In-person jobs in my location:

- **Project 1:** I developed a website for a school supply store and photocopier, based on my "Freelance Site" portfolio template.
- **Project 2:** I created a website for a wholesale distributor of refrigerated and sausages, with future plans to implement a virtual store with shopping cart and user registrations.
