OBJETIVE

As a Software Development professional, I have solid experience in PHP and its frameworks, as well as knowledge in computer security and pentesting. My goal is to apply and expand these skills in a dynamic professional environment, where I can continue my professional growth, development and improvement on an ongoing basis.

IDIOMAS

Spanish (native)

English (basic)

KEVIN RUDY MÁRMOL

SOFTWARE DEVELOPMENT TECHNICIAN

PROFESSIONAL PROFILE

I graduated as a Higher Technician in Software Development at the Blas Pascal University, and I specialized mainly in PHP for the backend side. I have accumulated significant experience in this area and have carried out numerous successful projects that demonstrate my PHP prowess. I recommend visiting my web portfolio that reflects my dedication and skills in this technology and you will see more detailed information about me.

Additionally, I have course certifications in PHP, Python, C#, CSS, SASS y JavaScript, as well as experience in relational databases, specifically MySQL , but I plan to learn MongoDB soon. During my university internship, I acquired knowledge in the Visual Studio Community for web development with .NET in C#, JavaScript and Typescript.

I have a certificate in computer security and skills in auditing, pentesting and ethical hacking. Currently, I am expanding my knowledge with frameworks such as Laravel, Symfony, Angular, Django and Flask. I also have experience developing video games with Unity using C#.

Additional Information:

• Preference for remote work, although I am available to work in person according to the needs of the position and willing to move to the required location

• Flexibility to adapt to any location, without preference particular for working exclusively in Argentina

SKILLS

•Web development (HTML, CSS, JavaScript, SASS)

• Application development (PHP → **Greater degree of specialization**, Python, C#)

• Knowledge of AJAX for asynchronous interactions

• Apache Server Management

• Management of relational databases (MySQL)

• Frameworks (Laravel, Angular, Django, Flask, Symfony)

Full Stack Dev/Junior Dev

Santa Rosa, La Pampa
Argentina

kevin.marmolr@gmail.com

Portfolio web:

https://vikekn.github.io/portafolio-vk/

•Libraries Jquery, React(Currently studying it), Node.js

• Automation tools (Gulp)

• Computer security and pentesting

• Experience with APIs and REST APIs

•Video game development as a hobby in Unity (C#)

EDUCATION

Blas Pascal University, Santa Rosa, La Pampa (2020-2023)

- I obtained very good grades during my studies at Blas Pascal University, finishing with an average of 9.17

Extra training on Udemy (2017-Present)

- Thanks to the paid courses that I have been acquiring, I have achieved numerous personal projects to strengthen my practices, my completion certificates can be seen in my web portfolio

WORK EXPERIENCE:

I did two jobs for people close to me, who required a website for their businesses, but it was not a completely fullstack job since it was completely frontend with views, I used as a template the project that is in my portfolio called Freelance Site to create a website for a school supply store and photocopier.

I invite you to explore my web portfolio to see concrete examples of my skills in both Frontend and Backend development! Here are three featured projects you can try:
