Portfolio web

OBJETIVE

I am looking for job opportunities in companies that allow me to continue improving my skills and demonstrate what I am capable of. My goal is to apply and expand these skills in a dynamic professional environment, where I can continue my professional growth, development and improvement on an ongoing basis. Likewise, I aspire for my job to allow me to pay for my studies to learn English and open the doors of the world to achieve my professional and personal ambitions.

IDIOMAS

- Spanish (native)
- English (basic)

ADDITIONAL INFORMATION

- Preference for remote work, but available to work in person and willing to move if necessary.
- Flexibility to adapt to any location, without particular preference for working exclusively in Argentina

KEVIN RUDY MÁRMOL

SOFTWARE DEVELOPMENT TECHNICIAN

PROFESSIONAL PROFILE

Graduated as a Higher Technician in Software Development at Blas Pascal University, specialized in PHP for backend, but I have also worked with languages such as Python and C# in .net, in addition to its different frameworks. I have completed numerous successful projects that demonstrate my skill in this area. My web portfolio reflects my dedication and skills in PHP and other languages and technologies.

SKILLS

- **Web Development: : HTML, CSS , JavaScript , SASS**
- **Backend and Applications: PHP (higher specialization), Python , C#**
- **Databases: MySQL (planning to learn MongoDB)**
- **Frameworks: Laravel, Symfony, Angular, Django, Flask**
- **Libraries: jQuery, React (under study), Node.js**
- **Computer Security: Audits, pentesting, ethical hacking**
- **Video Game Development: Unity (C#) as a hobby**
- **Tools: Visual Studio Community, Gulp, AJAX, Apache**
- **APIs: Experience with REST API**

EDUCATION

Blas Pascal University, Santa Rosa, La Pampa (2020-2023)

- I obtained very good grades during my studies at Blas Pascal University, finishing with an average of 9.17

Extra training on Udemy (2017-Present)

- My completion certificates can be seen in my web portfolio

WORK EXPERIENCE:

Online Freelance:

• Performed a large amount of fullstack web development work for clients on remote work sites, ranging from conceptualization to full implementation.
• I used a variety of technologies and languages, including PHP, C#, Python, JavaScript, HTML, CSS and SASS, as well as frameworks such as Laravel for PHP, Django for Python and among others, creating customized solutions according to the needs of each client.

In-person jobs in my location:

• **Project 1**: I developed a website for a school supply store and photocopier, based on my "Freelance Site" portfolio template.
• **Project 2:** I created a website for a wholesale distributor of refrigerated and sausages, with future plans to implement a virtual store with a shopping cart and user registrations.
